

All data contained is preliminary and is subject to change as more information is reported to Ohio Department of Health (ODH). Data presented in this document is based on data as of 06.26.2020 11:00am (for Stark County data) and/or 2:00pm (for Ohio data). Cases from previous days are likely to change as more information is entered.

For questions regarding this report, please contact: Amanda Archer, MPH <u>aarcher@cantonhealth.org</u> Jessica Boley, RD, LD <u>jboley@cantonhealth.org</u> Chelsea Sadinski, MPH <u>SadinskiC@starkhealth.org</u>

Stark County Epi Situational Report - COVID-19 Table 1 as of: 06/26/2020 2:00PM

Next report scheduled: 06/30/2020

Cases Reported to Stark LHDs			
Data as of 06.26.2020 1200			
Positive/Confirmed	933		
Hospitalized	185	19.83%	
ICU Admissions	41	4.39%	
Deaths in Confirmed			
Cases	107	11.47%	
Probable Cases	59		
Deaths in Probable			
Cases	4		

Cases Reported to ODH*			
Data as of 06.23.2020 1400			
Positive/Confirmed	45172		
Hospitalized	7496	16.59%	
ICU Admissions	1904	4.22%	
Deaths in Confirmed			
Cases	2545	5.63%	
Probable Cases 3466			
Deaths in Probable			
Cases	243

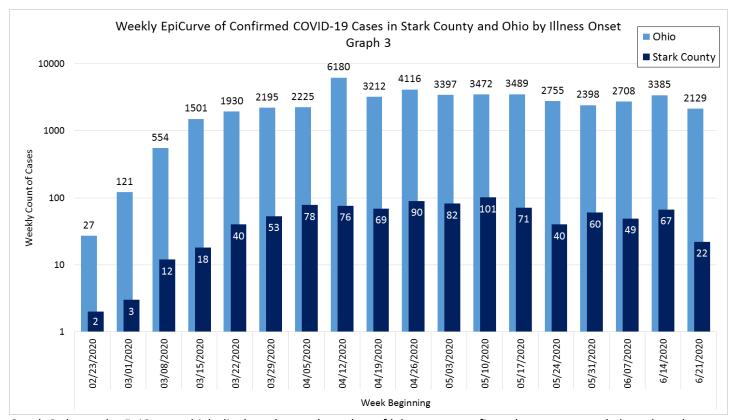

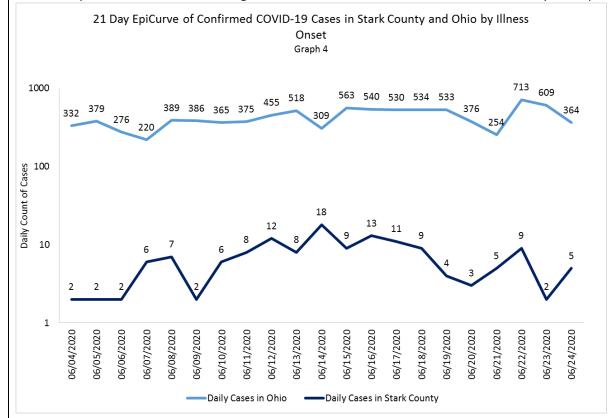

Graph 1 shows the incidence of signs and symptoms reported in confirmed cases of COVID-19 in Stark County. Two symptoms that are similar are subjective fever where in a patient felt feverish and fever in which is defined as a fever of >100.4F (38C). Additional symptoms may be added in the future as prevalence increases.

> Graph 2 shows the total number of confirmed and probable cases and deaths in those cases by age group. Age groups may be broken down further as new cases emerge. Deaths counted are based on both laboratoryconfirmed cases and probable cases.

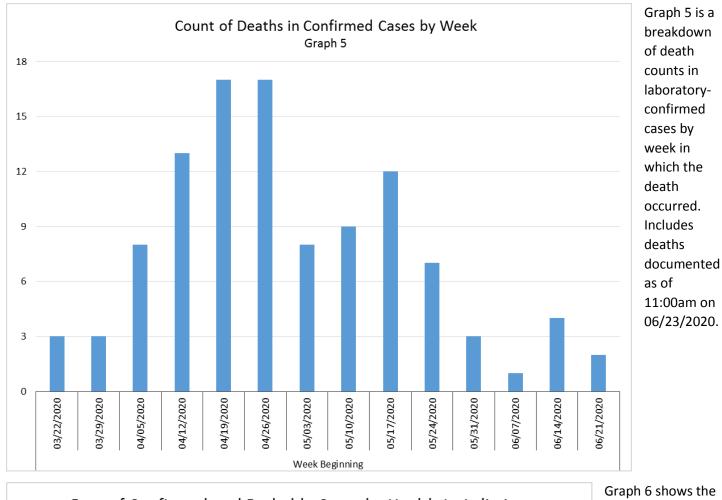

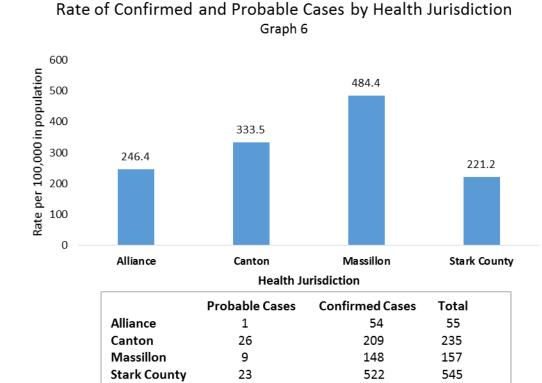

Graph 3 shows the EpiCurve which displays the total number of laboratory-confirmed cases per week, based on the illness onset date for Stark County and Ohio. If the illness onset date is not available, the earliest known date is utilized, which could include the date the specimen was collected, the date of the test results or the date reported to the local health department. Counts will change as additional information is collected. Totals may not equal the totals on Table 1

depending on when data was accessed. Stark County's first confirmed case reported an illness onset date of 2/25/2020, while Ohio had cases prior to 2/23/2020, those are not included. **This data is as of 11:00am on 6/26/2020.**

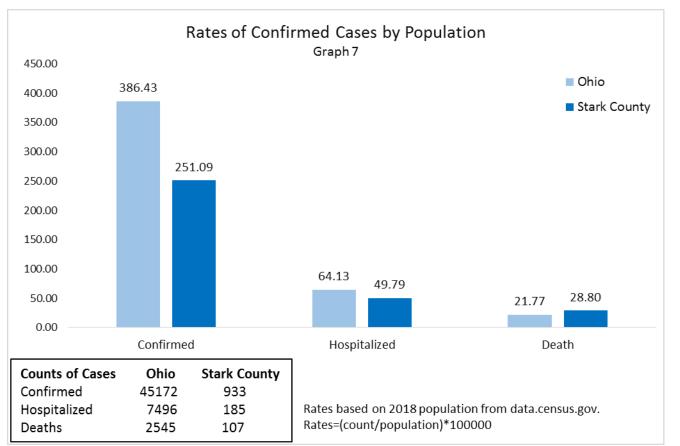

To help highlight short-term daily changes, Graph 4 shows daily case counts of laboratory confirmed cases.

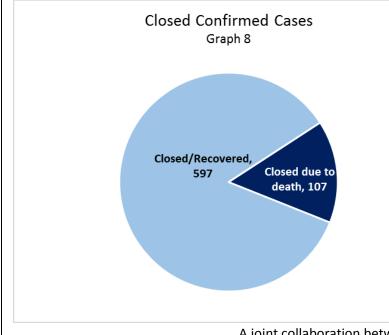

rate of confirmed and probable cases by Stark County jurisdictions. Alliance, Canton and Massillon jurisdictions covers those within those particular city limits. Stark County jurisdiction covers all other areas outside of those three city limits. Rates calculated by 2018 population census data. Rates= (case count/population) *100000

EPIDEMIOLOGICAL REPORT ON COVID-19

Graph 7 shows the rates dependent on the 2018 population in Ohio and Stark County. This graph works to compare cases in different populations by normalizing the cases per 100,000 persons.

- Ohio's rate of laboratory confirmed cases is 1.5x higher than those in Stark County.
- Ohio's rate of laboratory confirmed cases who require hospitalization is 1.3x higher than Stark County's rate.
- Stark County's rate of death due to COVID-19 complications is 1.3x higher than Ohio's rate.

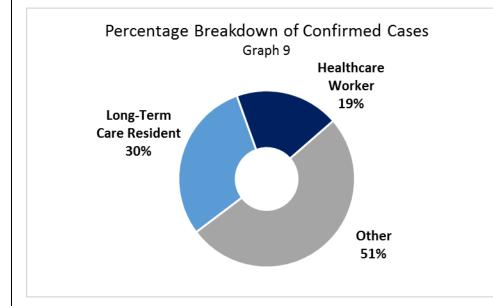

Graph 8 is the counts of cases closed, either due to closed/recovered or closed due to death. Stark County has a total of 704 cases closed of which 107 (15%) are due to death.

Cases can be closed for the following reasons:

- The person passed away.
- Symptoms have resolved in that case.

• The person is no longer being followed by the local health department.

As we are seeing more of a focus on health care workers and long-term care facilities, we are offering some additional information.

Graph 9* shows a breakdown of categories in confirmed cases. Healthcare workers account for 19% of the confirmed cases while longterm care residents account for 30% of confirmed cases. The remaining 51% do not belong in either of those categories. The percentages are based off of those that were affirmatively indicated to be either a healthcare worker or long-term care resident.

For more information on long-term care facilities including breakdown by facility and by resident/staff, please visit: https://coronavirus.ohio.gov/wps/portal/gov/covid-19/dashboards/long-term-care-facilities/cases https://coronavirus.ohio.gov/wps/portal/gov/covid-19/dashboards/long-term-care-facilities/cases https://coronavirus.ohio.gov/wps/portal/gov/covid-19/dashboards/long-term-care-facilities/mortality

*Due to priority testing guidelines both long-term care residents and healthcare workers, were initially in High Priority groups for testing. As testing has progressed, other Stark County residents are able to be tested on a more regular basis. Link for more information on priority categories is included on the last page of this document.

Background from www.cdc.gov: Coronavirus disease 2019 (COVID-19) is a respiratory illness that can spread from person to person. The virus that causes COVID-19 is a novel coronavirus that was first identified during an investigation into an outbreak in Wuhan, China.

A confirmed case or death is defined by meeting confirmatory laboratory evidence for COVID-19. A probable case or death is defined by i) meeting clinical criteria AND epidemiologic evidence with no confirmatory laboratory testing performed for COVID-19; or ii) meeting presumptive laboratory evidence AND either clinical criteria OR epidemiologic evidence; or iii) meeting vital records criteria with no confirmatory laboratory testing performed for COVID19.

Counts and rates are based on date of illness onset. If onset date is unknown, the earliest known date is utilized. Any rates based on counts less than 10 are considered unreliable and caution should be exercised when interpreting. Due to testing restrictions, data may be skewed. Report compiled by Canton City Public Health.

Data is sourced from: coronavirus.ohio.gov, ODH data warehouse, and census.gov. "These data were provided by the Ohio Department of Health. The Department specifically disclaims responsibility for any analyses, interpretations or conclusions."
