A joint collaboration between Stark County Public Health Agencies:

Alliance City Health Department Massillon City Health Department

Canton City Public Health Stark County Health Department

Stark County, Ohio
August 12, 2021 Epi Report

COVID-19 Snapshot Stark County, Ohio as of 12:00pm August 12, 2021 July 29, 2021-August 11, 2021

Number of Confirmed & Probable Cases in Stark County

527

Rate per 100 000 in Stark County Population

Rate per 100,000 in Stark County Population 142.2

CDC Level of Community Transmission: Substantial 8/4/2021-8/10/2021

Confirmed Cases

Total: 29,100

Active/Open Cases: 1,779

Closed: (includes Deaths) 27,321

Closed due to Death: 855

Probable Cases

Total: 5,459

Active/Open Cases:

Closed: (includes Deaths) 5,154

Closed due to Death: 142

Hospitalized Confirmed & Probable Cases

Yes: (includes ICU) 2,158

> Yes, ICU: 163

Discharged: 1,112

Age Range

Confirmed Cases: <1-108

Hospitalized in Confirmed Cases:

Deaths in Confirmed Cases: 21-108

All data contained is preliminary and is subject to change as more information is reported to Ohio Department of Health (ODH). Data presented in this document is based on data as of 08/12/2021 12:00 pm (for Stark County data) and/or 2:00pm (for Ohio data). Cases from previous days are likely to change as more information is entered. Caution should be exercised as data is subject to change. Numbers may differ from ODH depending on time data was accessed.

Count	887	140	7	4	32	166
%	71.8%	11.3%	0.6%	0.3%	2.6%	13.4%

*Unknown counts includes refused to answer responses Hospitalization Information for Stark County Confirmed Cases-Cumulative Counts

Hospitalized		If hospitalized, in ICU?		Discharged from Hospital				
Yes	2,093	7.2%	Yes	159	8%	ICU	119	
No	25,016	86.0%	No	1,934	92%	Other	960	
Unknown	1,991	6.8%				Some case	s may be dis	scharged due
							to death.	

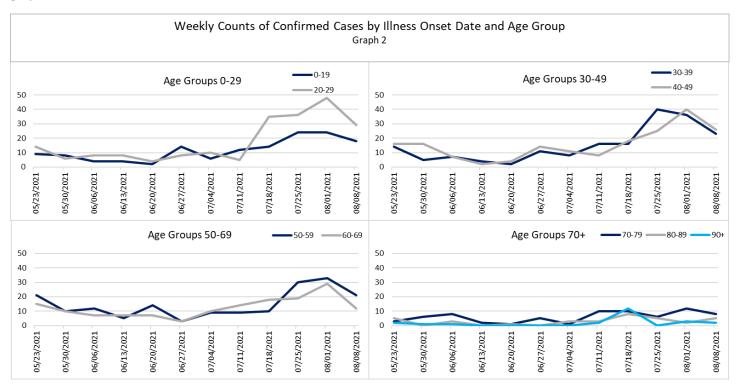

Stark County Vaccination Update as of 8/12/2021

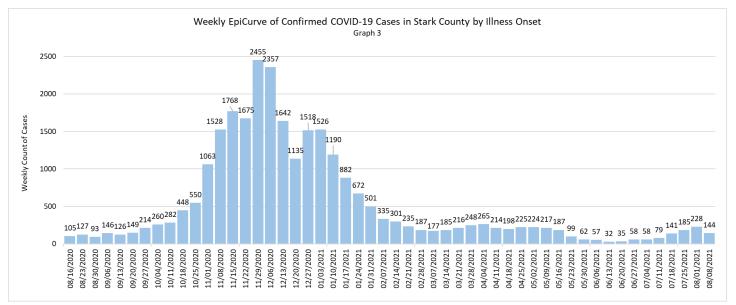

Current Vaccination Groups Eligible	Vaccine Started	Vaccine Completed	
Persons aged 12 and over	Count: 173,808	Count: 161,301	
	46.90% of population	43.52% of population	

Graph 1 shows the cumulative number of laboratory-confirmed cases by age group by year of diagnosis. There 9 confirmed cases (8 from 2020, 1 from 2021) in which date of birth is currently unknown and not shown in graph above.

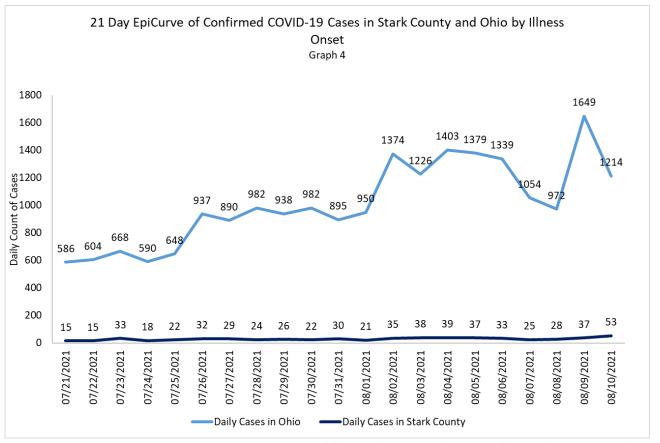

Graph 2 shows a breakdown of confirmed cases by week by age groups. As with all data contained in this report, caution is advised when looking at the past 2-3 weeks of data due to delays in testing results. Only 12 weeks of data is shown in graphs below.

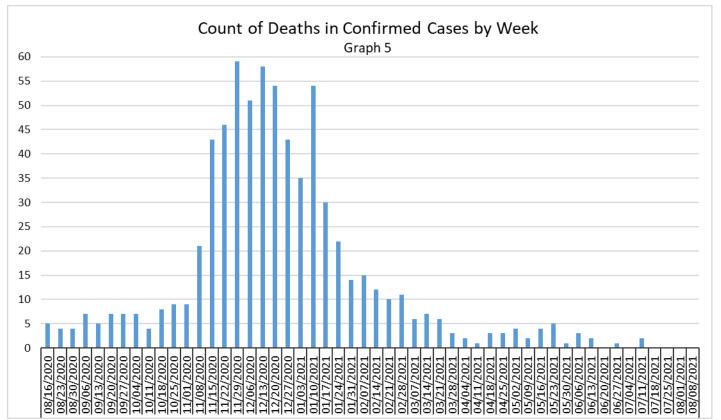

Graph 3 shows the EpiCurve which displays the total number of laboratory-confirmed cases per week, based on the illness onset date for Stark County. If the illness onset date is not available, the earliest known date is utilized, which could be the date the specimen was collected, the date of the test results or the date reported to the local health department. Counts will change as additional information is collected. Stark County's first confirmed case reported an illness onset date of 2/25/2020 but graph only contains 52 weeks of data. **This data only includes data up until 12:00 pm on 8/12/2021.**

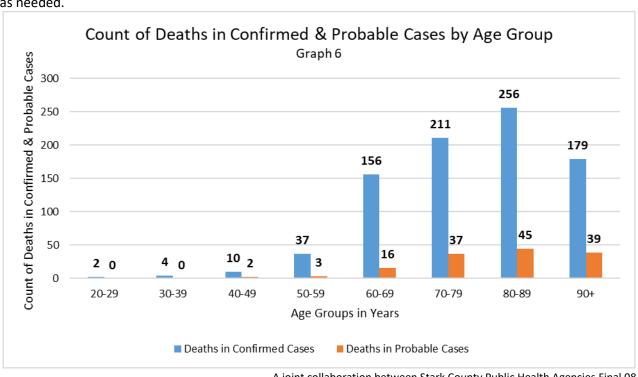

To help highlight short-term daily changes, Graph 4 shows daily counts of laboratory confirmed cases for a 21-day period. Due to decreasing case counts, this graph was updated on 7/8/2021 to no longer utilize a logarithmic scale.

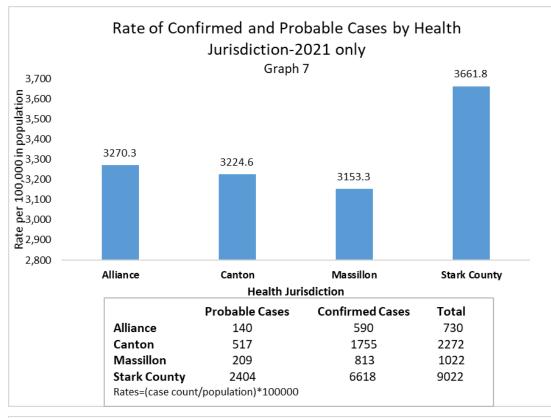

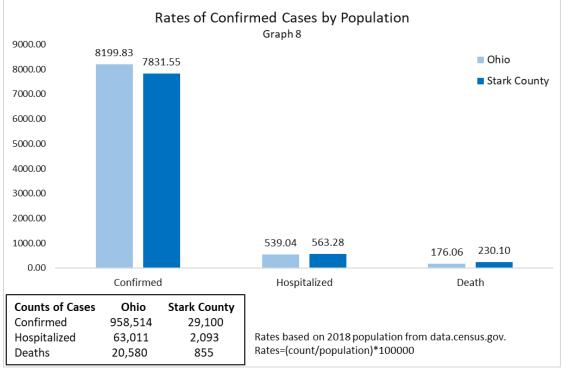

Graph 5 is a breakdown of death counts in laboratory-confirmed cases by week in which the death occurred. Includes only deaths reported to the local health department as of 12:30 pm on 8/5/2021. This isn't an automated process which is why it may be a week or longer for a death to be documented. Please see last page of report for additional information regarding deaths.

Graph 6 shows the breakdown in deaths in confirmed and probable cases by age group. Additional age groups will be added as needed.

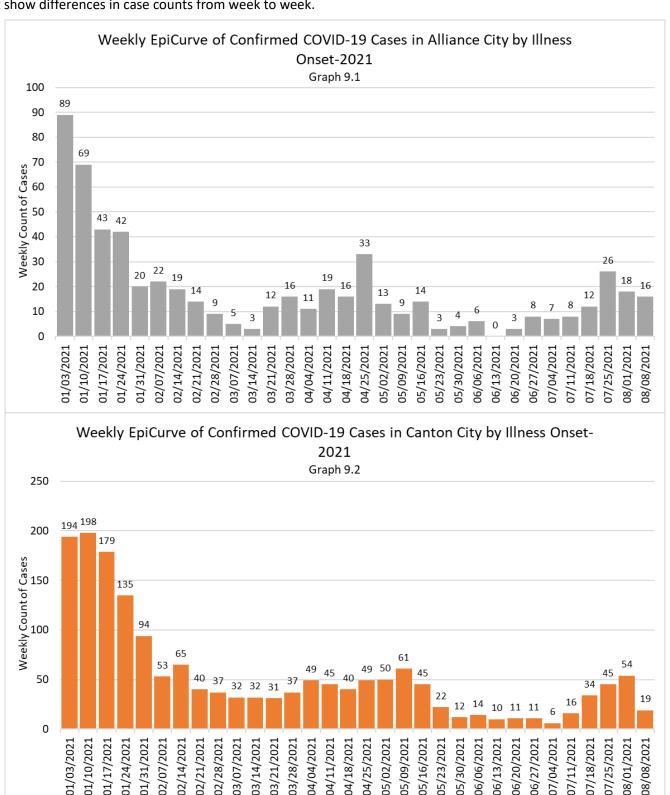

*Graph updated since 6/2021. Only includes cases with illness onset **in 2021.** Graph 7 shows the rate of cumulative confirmed and probable cases by Stark County jurisdictions. Alliance, Canton and Massillon jurisdictions covers those within those particular city limits. Stark County jurisdiction covers all other areas outside of those three city limits. Rates calculated by 2018 population census data.

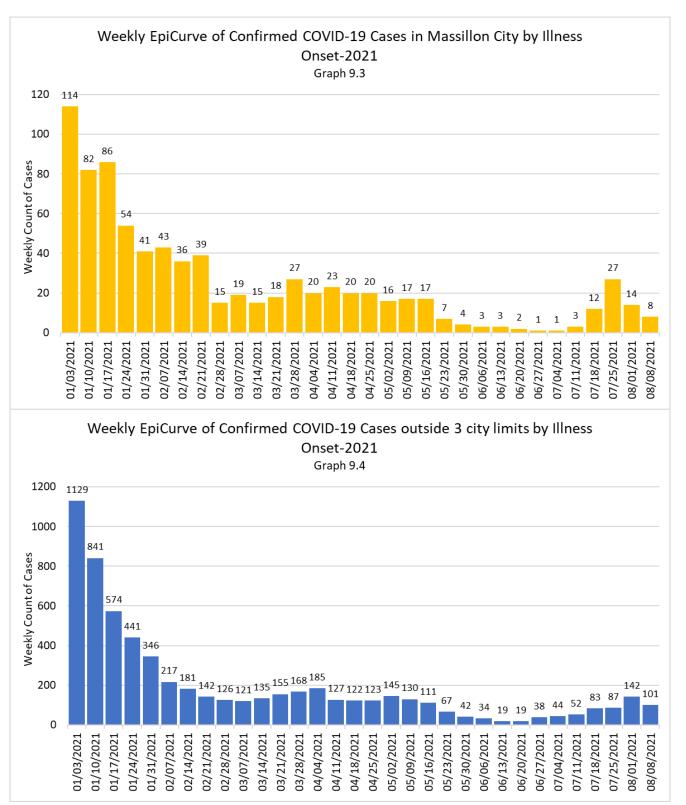

Graph 8 shows the rates dependent on the 2018 population in Ohio and Stark County. This graph works to compare cases in different populations by normalizing the cases per 100,000 persons.

- Ohio's rate of laboratory confirmed cases is 1.0x higher than those in Stark County.
- Stark County's rate of laboratory confirmed cases who require hospitalization is 1.1x higher than Ohio's rate.
- Stark County's rate of death due to COVID-19 complications is 1.3x higher than Ohio's rate.

To give health jurisdictions a clearer picture of cases within the 3 city limits and outside of those city limits, new graphs have been added. Graphs 9.1, 9.2, 9.3 are for each of the 3 city centers in Stark County. Graph 9.4 is for cases that occurred in residents outside of the 3 city limits. Please be aware that all 4 graphs have differing y-axis (vertical axis) to best show differences in case counts from week to week.

Based on stakeholder feedback, we have removed the graph on closed cases in August 2021.

We have removed the graph associated with health care workers and long-term care facilities. For more information on long-term care facilities including breakdown by facility and by resident/staff, please visit: <a href="https://coronavirus.ohio.gov/wps/portal/gov/covid-19/dashboards/long-term-care-facilities/cases/https://coronavirus.ohio.gov/wps/portal/gov/covid-19/dashboards/long-term-care-facilities/mortality

Background from www.cdc.gov: Coronavirus disease 2019 (COVID-19) is a respiratory illness that can spread from person to person. The virus that causes COVID-19 is a novel coronavirus that was first identified during an investigation into an outbreak in Wuhan, China.

Confirmed

• Meets confirmatory laboratory evidence. NOTE: Asymptomatic infections are reportable as confirmed cases.

Probable

- Meets presumptive laboratory evidence AND was reported on or after November 1, 2020; OR o For reports received prior to November 1, 2020: meets presumptive laboratory evidence AND either clinical criteria OR epidemiologic linkage; OR
- Meets clinical criteria AND epidemiologic linkage with no confirmatory laboratory testing performed for SARS-CoV-2; OR
- Meets vital records criteria with no confirmatory laboratory evidence for SARS-CoV-2.

Counts and rates are based on date of illness onset. If onset date is unknown, the earliest known date is utilized. Any rates based on counts less than 10 are considered unreliable and caution should be exercised when interpreting. Due to testing restrictions, data may be skewed. Report compiled by Canton City Public Health.

Data is sourced from: coronavirus.ohio.gov, ODH data warehouse, and census.gov. "These data were provided by the Ohio Department of Health. The Department specifically disclaims responsibility for any analyses, interpretations or conclusions."

Beginning March 2, 2021, ODH changed from using Ohio Disease Reporting System (ODRS) for mortality data to utilizing Electronic Death Registration System (EDRS) data. This allows only deaths which have been verified by the CDC's National Center for Health Statistics (NCHS) to be included on the ODH website. This data is not updated daily. For the time being, Stark County will continue to utilize mortality data for ODRS with the disclaimer that data is considered preliminary and subject to change.
