

CANTON CITY PUBLIC HEALTH
DAILY AIR DATA

Current reporting date: 2023-03-17

The current air quality index (AQI) information is available at airnow.gov or the airnow app.

The pollen information is:

Pollen count:	19
Pollen count per type details:	Maple(2) Poplar(2) Juniper(2) Unidentified(1) Elm(12)
Category:	Moderate

Pollen counts are in count/m³. Counts are taken for the previous 24 hours, Monday through Friday mornings, and represent an hourly average. Actual levels at any particular time throughout the day may be higher or lower than the average count.

The fungi/mold information is:

Fungi/Mold count:	245
Fungi/Mold count per type details:	Unidentified
Category:	Low

Fungi/Mold counts are rounded to the nearest 10/m³. Counts are taken for the previous 24 hours, Monday through Friday mornings, and represent an hourly average. Actual levels at any particular time throughout the day may be higher or lower than the average count.

For pollen and fungi/mold questions, please contact the Laboratory Division at (330) 489-3231. Pollen and Fungi/Mold categories defined by [The American Academy of Allergy, Asthma, and Immunology](https://www.aacpi.org/).

For AQI questions, please contact the Air Pollution Control Division at (330) 489-3385.
