

Today's date is October 31, 2011.

The pollen and mold program has been discontinued for the year. It will resume by April 1, 2012. This is the final Air Quality Index as October 31, 2011 is the end of Ozone season.

The Air Quality Index is 27, which is classified as Good. The primary pollutant is Ozone.

It was overcast and 41° with 84% Relative Humidity. The air was calm, and 0.15" of rain had been collected.

We have really appreciated the opportunity to share the daily info with you. Have a good year and a great holiday season. We plan on starting up again in the spring.

Have a great day!

the lab staffs: Denny, Greg, Heather, Julie, and Jim

Pollen counts are rounded to the nearest 5/m³. Mold counts are rounded to the nearest 10/m³. Counts are taken for the previous 24 hours, Monday morning through Friday morning, and represent an hourly average. Actual levels at any particular time throughout the day may be higher or lower than the average count. Visit the *Laboratory* section of www.cantonhealth.org for more information on pollen and mold levels.
