Yellow fever

Any unexpected pattern of cases, suspected cases, deaths or increased incidence of any other disease of major public health concern, because of the severity of disease or potential for epidemic spread, which may indicate a newly recognized infectious agent, outbreak, epidemic, related public health hazard or act of bioterrorism.

# Class B:

Disease of public health concern needing timely response because of potential for epidemic spread — report by the end of the next business day after the existence of a case, a suspected case, or a positive laboratory result is known.
